Declaration of Virus Checks at Wibu-Systems Products

To whom it belongs

All Wibu-Systems products are tested and verified using state-of-the-art tools to make sure that they are virus free. The procedures are defined in Wibu-Systems' Quality Assurance System according to ISO 9001:2015 and guarantee, that a strict approval procedure has been done and documented before release of a product. This includes but is not limited the following:

1. All software, components, applications, installers and CD/DVD are checked against virus using up to date virus checking tools. This covers all products, i.e. WibuKey, CodeMeter, CodeMeter Embedded, Protection Suite (AxP), SmartShelter, License Central, CmCloud.
2. All CodeMeter hardware without flash disk hardware is using a human interface (HID), but the file system has a fix contents that cannot be modified by the user and is virus free.
3. All CodeMeter hardware with flash disk, i.e. CmStick/DMC, CmStickBMC, or CmCards get a disk image transfered in final production and testing procedure that is virus free.
4. All WibuKey hardware has no flash disk accesible on the host interface. So this hardware is virus free from principle.
